# DIAGNOSTIC MOBILE APP

## New Advanced Service Tool

Our new Suzuki Diagnostic App lets you send your Suzuki Authorized Dealer information they can use to service and maintain your outboard instantly and easily.

## How It Works

1. The outboard sends engine data and converts it into a QR code displayed on the Multi-Function Gauge or Multi-Function Display.

2. With the SDS Mobile App, you can then scan the QR code on the Multi-Function Gauge or Multi-Function Display with your phone. The engine data will be stored on your smart phone.

3. You can then send the engine data via email to your Suzuki Dealer.

SDS Mobile works in tandem with our new Multi-Function Gauge and new Multi-Function Display. Simply download the App, available on iOS and Android™, to your smartphone: you don't need a separate device.

# SUZUKI C-10 & NMEA 2000 ACCESSORIES PARTS LIST

The Suzuki Color Display is a LED high-resolution screen that has very sharp, crisp lines and is extremely easy to read. It has a bonded glass front screen so whether it be sun, salt, or UV rays, your screen will never blur or fade like a plastic cover. The C-10 has its mounting points in the front so there is no need to crawl under your console to mount it. There is one easy connection to Suzuki's digital harness. Save your favorite programming and update the display using the Mini USB port. The C-10 is able to monitor functions such as RPM, Speed\*, Water Pressure\*, Fuel Level\*, Fuel Consumption, Coolant Temperature, Oil Level, Oil Temperature, Trim Level, Hours, or Volts. The C-10 is able to monitor up to 2 engines simultaneously. The Suzuki C-10 can be retro-fitted, to replace a 4" round gauge. (\* additional sensors required)

## Development of Suzuki's First Contra-Rotating Propeller

After years of outboard design, Suzuki engineers knew that the shape of the lower unit and the design of the propeller would have a critical impact on performance. The increased power of the new engine required more powerful gears, and more powerful gears were typically larger. After considering alternatives, an innovative idea was proposed: design a contra-rotating dual propeller system. The contra-rotating propeller would certainly provide more "grip" underwater, and because contra-rotating propellers distribute the engine torque evenly over the two propellers, the torque per propeller decreases and gear diameter can be reduced. A reduction in gear diameter could then lead to the design of a smaller, more hydrodynamic gear case.

## Splash Covers

Suzuki vented Splash Covers are custom made, tight-fitting covers that are designed to protect the outboard engine cowlings and decals from sun, spray, salt, birds, errant fish hooks, and anything else that can compromise the factory finish while the engine is running. The Polysoft II fabric is a breathable, marine grade fabric that is 95% waterproof and 5% breathable which ensures that moisture will not be trapped under the cover. This 100% woven polyester fabric is UV stabilized to resist fading and rotting. The soft non-woven lining will not scuff or damage your cowling when installed. Splash Covers are easy to clean and will be sure to turn heads! Please note: all engine covers 150hp and up will have gray graphics, while all engine covers 140hp and below (including DF4/6 carry bag) will have red graphics.
